

BANDIT & DAREDEVIL RULE AMENDMENTS

5/17/10

A Rule amendment was made Saturday night, May 15, 2010 after discussions with all active Bandit and Daredevil drivers to change the left side weight percentage. The rule now reads as follows:

The total car weight with driver will remain 2150 lb but the left side weight will change from 52% to 54%. This will allow drivers to easily achieve the weight rule without adding excessive weight to the right side. This change is issued due the safety of the drivers in competition, and for the betterment of the class.

Canaan Fair Speedway Tech Officials reserve the right to add weight to individual cars on a case by case basis as deemed necessary for fairness of competition.

ADDITIONAL RULE UPDATES

Weight rule #4 which says "All added weight, lead, steel, must be bolted or boxed securely in front of the rear axle, on the inside of the car on the right hand side" we will remove the wording of on the right hand side.

Rule # 5 will remain the same.

Give me a call and we can discuss further.
